Hesi Bloom Complex 1L

Model: dl-HES5040

Hesi Bloom Complex 1L

Manufacturer: -

Hesi Bloom Complex 1L (HES5040) Hesi Bloom Complex provides all the necessary substances to plants during the flowering cycle. Apart from the nutrition (nitrogen, phosphorus, potassium, magnesium, calcium, etc.), Bloom Complex has also been enriched with amino acids and vitamins that stimulate plant development. The result of this is an exuberant bloom! In addition, Bloom Complex contains a pH corrector which corrects the pH level of the feeding water to a slightly acidic value, allowing the plant to absorb all the administered nutrients more efficiently.
