High Flow Reverse Osmosis System-1000GPD

Model: HLE1000

High Flow Reverse Osmosis System-1000GPD

Manufacturer: C.A.P. Custom Automated Products

Hydrologic Evolution

Achieve the highest flow rates from the most efficient and evolved RO system on the planet! Capable of producing more than 1,000 gallons per day or 42 gallons per hour of pure water at standard line pressure of 60 psi. Removes 95%+ of all Parts Per Million from your tap water including calcium, excessive minerals and other contaminants and toxins. Save more water by running a 2:1 recovery ratio or the optional 1:1 ratio included with the system. Includes custom KDF/Catalytic carbon filter for reduction of chlorine, chloramines, iron, sulfur, and heavy metals—great for city or well water. Also includes 2 high flow RO membranes, in-line shut off valve, water supply hookup, tubing, and all necessary components for simple and quick setup. Measures 21" x 11" and comes with a 1 year warranty.

Price: \$598.46
