

Honey Organic ES 32 oz.

Model: hf-HNHHO405

Honey Organic ES 32 oz.

Manufacturer: Humboldt Nutrients

Humboldt Nutrients Honey Organic ES 32 oz. (HNHHO405) Humboldt Nutrients Humboldt Honey ES is a premium blend of cane molasses, yucca, kelp and ocean fish, this carb source is as unique, as it is strong. The ES means Extra Strength. It increases brix levels by providing sugars to beneficial bacteria, fungi, and your plants.

Just as the human body hosts beneficial bacteria in the digestive system, plants must host microbial life in their root zone to ensure proper digestion, growth and health. Plants feed mycorrhizal and bacterial organisms near their root zone with carbohydrates. This is the symbiotic relationship between plants and micro organisms.

When a plant goes into a fruiting cycle they immediately divert sugars and carbohydrates from their root zone to their fruiting bodies. It is at this time that using Humboldt Honey ES becomes most crucial.

As the plant naturally channels carbohydrates to new flowers, buds, and fruits, the microbial life in the root zone suffers and starves.

By using our thick premium Humboldt Honey ES in conjunction with our nutrient feeding schedules you not only enhance the quality, flavor and quantity of your crop, but you maintain all the healthy microbial life present in the plants digestive system, the root zone and surrounding soil.

DIRECTIONS: Add 5-10 mL per gallon.

DERIVED FROM: Kelp Extract, Pure Cane Molasses, Yucca Extract and Ocean Fish.
