Humic Acids, 15% 250ml

Model: hf-TFHA250ML

Humic Acids, 15% 250ml

Manufacturer: Technaflora

Technaflora Humic Acids, 15% 250ml (TFHA250ML) Liquid Humus is an unsurpassed natural and organic source of concentrated essential nutrients, vitamins, and trace elements. Technical humic acids aid plants to best utilize the vitamin and nutrient benefits of a complete feeding program. These complex molecules are formed as organic matter decays and occur naturally in soils, peat, oceans, and fresh waters. Technaflora's concentrated Liquid Humus is a 100% organic solution of 15% technical humic acids extracted as salts from a soft coal called Leonardite. Humic acids are able to chelate metals, notably iron, facilitating easier absorption by plants.

Liquid Humus increases the permeability of plant membranes and the buffering capabilities of the medium, promoting the uptake of nutrients. Excellent for use in both hydroponic and soil environments, humic acids can be especially beneficial in dry areas by aiding in water retention. With the systematic application of Liquid Humus, e results are healthier, lusher plants with faster growth, more vigor, and larger yields.
