Hydrofarm Light Meter (Footcandles)

Model: hf-LG17000

Hydrofarm Light Meter (Footcandles)

Manufacturer: HydroFarm

Hydrofarm Hydrofarm Light Meter (Footcandles) (LG17000)Photosynthesis and plant growth depend on the sun or specially-designed lighting systems. But of that light reaching the plant, only specific types of energy (in the lighting spectrum) drive the photosynthesis process. Since light is the most important single factor affecting your plants' life cycles, quality light meters are an essential tool in accurately determining if your crop is receiving the maximum light needed for healthy growth. A light meter allows growers an accurate means of adapting to their plants' needs as the light conditions change during a full growing season.

Features

Identify best light level of healthy plants

Easy to use hand-held design

Get precise reading with two scales

Includes instructions and "Consumer's Guide to Light Gardening" brochure

Lifetime silicon sensor - no batteries required

Read up to 5000 footcandles of sun, high intensity, or fluorescent light

Exclusive "Zero" calibration feature - accurate to 2%

Full two year warranty - the longest in the industry

Manufacturer's Product Information

MSRP each \$22.95

UPC638104170109

Dimensions2 x 6.5 x 3.38

Case Weight2

Case Quantity6

Price: \$15.09
