HydroGen CO2 Controller

Model: hf-HSCO2M

HydroGen CO2 Controller

Manufacturer: Hydro Innovations

Hydro Innovations HydroGen CO2 Controller (HSCO2M) Very affordable, and simply all you need to regulate CO2. This CO2 controller can accurately monitor room CO2 levels and turn CO2 regulators or generators on and off. The monitor is preprogrammed to turn devices on at 1300 ppm and off at 1500 ppm with overshoot already calculated. Instead of a costly digital readout, the HydroGEN CO2 monitor uses indicator lights to show approximate CO2 levels. Hydro Innovations uses a high quality, self calibrated, maintenance free SenseAir brand Infrared CO2 detector. The monitor has a standard 120 volt piggyback plug and includes an EZ mount wall bracket.
