

HydroHut Silver Edition Hut 2x4

Model: HHUT-002

HydroHut Silver Edition Hut 2x4

Manufacturer: C.A.P. Custom Automated Products

HYDROHUTS (HHUT-002)HydroHuts

The Silver Edition HydroHuts can be used to grow, bloom, clone or as a plant infirmary or nursery. The choices are all yours giving you complete control over your greenhouse and its environment. The HydroHuts can be outfitted with T5 fluorescent fixtures, compact fluorescents, or high intensity discharge lights. The frames are steel and the corners are steel. There will be no problem hanging whatever you need from inside our new ceiling structure which also has steel constructed support poles.

Using intake and exhaust blowers, temperature and humidity are easily regulated. CO2 can be added and fans controlled

by using third party atmospheric controls mounted to our Controller Mounting Board which will hang in any brand tent.

You can air cool the Hut or your light(s) separately and still have venting ducts to use as you wish. The Silver Edition easily

surpasses its rivals through noticeable, intelligent, differences. Better flaps around the door and the windows using Velcro

to insure it is light-tight, steel poles and corners for real strength, higher quality outer material that won't rip, more sewing

and material in crucial areas to help protect stress points, and more air vents to do as you wish.

The Silver Edition series offers more ventable duct openings & more electrical ports than any grow tent on the market.

Allowing you to set up your Hut as you wish by giving you as many options as possible will make your growing experience

more convenient. All Silver Editions will hold from 4" to 8" insulated duct hose through any of their duct openings. The 4

x 8 edition has 6 side ducts, 2 rear ducts, 2 roof ducts and 5 electrical ports to run your electrical cords out wherever you

desire. Passive air vents can be closed or rolled open as you choose.
