Ideal H2O Professional Series Reverse Osmosis System - 2000 GPD

Model: 738400

Ideal H2O Professional Series Reverse Osmosis System - 2000 GPD

Manufacturer: -

The Ideal H2O™ Professional Series Reverse Osmosis Systems are state-of-the-art, versatile systems for treating tap and well water supplies and with flow rates ranging from 2,000 to 4,000 gallons per day. Minimal energy consumption, low maintenance and operation costs makes them the ideal choice for a variety of applications. Big on features but not on space, Idea H2O™ Professional RO systems feature a robust, innovative design that allows for versatility in the event of feed water quality and temperature variations. A C23 switch controller with feed flush comes standard to reliably operate the system. HF5-Series Extra Low Energy membranes are standard on all systems and offer high rejection and flow rates for quality system performance. Systems also feature a heavy duty 1/2 HP stainless steel multistage booster pump for superior performance and corrosion resistance. Unit size is 18 x 18 x 45 inches. 120 volt 1 phase 60 Hz. 2,000 GPD unit has 1 membrane and weighs 100 lb. 4,000 GPD unit has 2 membranes and weighs 120 lb.
