## Jump Start 24 Grow Plug Greenhouse

Model: hf-JS24GP

Jump Start 24 Grow Plug Greenhouse

Manufacturer: HydroFarm

Mini Germination Station - The perfect indoor start to your garden!

Available exclusively from Hydrofarm, the Jump Start Mini Germination Station is an ideal way for the space-challenged gardener to start seeds indoors all year round. The Mini Germination Station comes complete with a 24-cell seedling insert, a waterproof tray, a 2" vented dome, rooting additive, and a choice of naturally composted Grow Plugs or Rockwool Macroplugs.

The vented dome helps to maintain just the right amount of humidity to ensure germination success and bigger, healthier seed starts. The compact size of the station allows anyone with a spare corner to start a garden. Refills of Grow Plugs and Macroplugs are available for purchase separately.

Includes: • 2" vented dome • 24-cell seedling insert • Waterproof tray • Grow plugs • Rooting additive

**Price: \$13.93**
