King Wing DE Reflector

Model: dl-HT105001

King Wing DE Reflector

Manufacturer: -

The King Wing is made of 25mm thick nanochrome aluminum and measures 36" x 36". It is manufactured in North America and uses all ETL listed components. The product is quick and easy to assemble and weighs just 9 lbs. Independently adjustable wings allow the grower to create fully custom light patterns, as well as achieve a wider array of light while eliminating "hot spots" and "shady edges". The King Wing boasts higher luminosity per square inch than many of the wing and non-air-cooled reflectors on the market. The nanochrome aluminum is resistant to corrosion making it perfect for high humidity environments. Lamp cord included.

- Independently adjustable wings
- Nanochrome aluminum
- 25 min. thick aluminum
- Supersize 36 x 36
- Lamp cord included
- Lightweight: 9 lbs
- Creates wider array
- Fully customizable light pattern
- Eliminates "hot spots" and "shady edges"
- Quick assembly
- Higher luminosity levels per square inc
- Corrosion resistant
- Made in Canada
- ETL listed components
- Quick assembly
