KPO 12 PORTABLE AIR CONDITIONER (KKPO12-23)KPO 12 PORTABLE AIR CONDITIONERS

Introducing KwiKool's KPO model portable indoor/outdoor package unit. This innovative product combines the compact size, portability, and great features that you've grown accustomed to with KwiKool products, but with the punch and performance of a prizefighter. The KPO offers 12 tons of cooling in an incredibly small package, similar to the size of most 5 ton models from other manufacturers. The super small 32"x 64" footprint of this unit allows it to fit through a standard 36" door and can be used outside by ducting the cold air in, or inside by ducting the hot air out. Flexible power and duct connections are secured in seconds and ensure rapid set up & tear-down with minimum hassle, time, and cost. Our heavy duty integral skid has wheels and fork access for easy movement, setup, and transport.

Maximum flexibility for both indoor and outdoor applications

Extra Small Size at W-32" x L-64" x H-62"

Skid mounted with removable 8" durable wheels for easy & flexible mobility

Condenser, cold supply & return air can be ducted using high static blowers

Cam locks with internal circuit breaker for easy power hook up

Phase & power monitor provides electrical protection from power quality issues

Low ambient temperature controls

Digital controls with auto restart and short cycle protection

PORTABLE AIR CONDITIONERS

For industrial use, greenhouses, warehouses and more, a commercial portable air conditioner offers sturdy construction, reliability, and an array of useful features. A commercial portable air conditioner can provide the powerful and reliable cooling that you need, and you can take it with you when you leave.

The KwiKool Portable Air Conditioner can be used in almost any environmental condition. It is rated from 60° to 110°F and functions

perfectly as a spot cooler. But it does more – much more. The KwiKool Air Conditioner has a thermostatic expansion valve which

adjusts the flow of freon to suit the ambient conditions. Its sophisticated microprocessor control system and advanced constant

pressure and fan-control freeze protection allows the unit to maintain a temperature set point with pinpoint

accuracy for critical environments at temperatures down to 60°F. KwiKool's unique In/Out Integral Condenser system (see diagram) is what you want to use. This exclusive feature brings air from outside of the conditioned space to cool its condenser, then pumps the hot air back outside of the cooled room totally isolating the condenser air from the enclosed cooled area. Outside air and inside air are never mixed (ducting not included). This is a balanced air flow system and is the only Portable Air Conditioner on the market today that has this unique ability built-in. They are available in 3 different configurations to match your situation. Standard, Split (the compressor can be located up to 100' away from the air handler), and Water Cooled, where no condenser ducting is needed. Please note that these are TRUE BTU values, not over-hyped ratings by the cheap manufacturers. The smallest, most versatile 12-Ton Indoor/Outdoor Portable Air Conditioner in the world!
