LED Grow Light 350, Magenta

Model: hf-KSH350M

LED Grow Light 350, Magenta

Manufacturer: Kessil

Kessil LED Grow Light 350, Magenta (KSH350M) The next level of LED lighting is here. Kessil presents H350 SPECTRAL HALOTM LED grow light, boasting 2.5x the light output of H150. By incorporating the latest 90W Dense Matrix LEDTM platform, H350 produces an extremely bright, penetrating stream of light that reaches deep into the canopy of the plant. H350 also features a new vapor cooling thermal management system that directs heat away from the high-intensity LED core quickly, maintaining the light's efficiency and long lifetime. This high-powered device will allow LED grow lights to viably replace traditional methods of lighting.

H350 - Deep Purple - Vegetative Emphasis, Special Penta-band Recipe The DEEP PURPLE model features a greater blue to red wavelength ratio to encourage stronger vegetative growth for fuller, healthier plants. Using five different types of LED chips with a strong emphasis on blue wavelengths, this penta-band recipe is designed to keep plants strong. H350 - Magenta - Flowering Emphasis, Unique Quad-band Formula With a much higher ratio in the red spectrum than the blue, the MAGENTA model focuses on performance during the bloom phase. This unique quad-band spectrum blends four different types of LED chips together and is ideal for the flowering stages of growth.
