Magical 20 It

Model: hf-TFMC20L

Magical 20 It

Manufacturer: Technaflora

Technaflora Magical 20 It (TFMC20L) MagiCal is a highly enriched formulated blend of magnesium and calcium that promotes vigorous and healthy plant growth for both soil and soilless gardens. Incorporated in your regular feeding program, MagiCal increases flower bud absorption and improves the nutritional quality of plants while reducing leaf chlorosis and deficiency-related disorders such as grape stem rot, grass tetany, tip burn in lettuce, blackheart in celery, blossom end rot in tomato or watermelon, and bitter pit in apple.

In addition to correcting nutrient deficiencies, MagiCal accelerates protein syntheses, maintains high starch content in crops, improves the density of fruit and the production of essential oils, creates lush and greener foliage, and maintains a healthy root system.

Designed for universal application and tested to work in conjunction with any premium brand of nutrients in the industry, MagiCal is for customers whose gardens require bolstered levels of magnesium and/or calcium.

MagiCal is scientifically formulated to make extra magnesium and calcium readily available during vigorous plant development. These elements are highly essential and can often times be deficient in both soil and hydroponic systems.

Completely soluble and clear of any sediment, MagiCal will mix with ease into any solution, providing an instantly available source of required nutrients.
