Marine Green Compost 1 cf

Model: hf-ROMG

Marine Green Compost 1 cf

Manufacturer: Aurora Innovations

Roots Organics Marine Green Compost 1 cf (ROMG) Roots Organics Marine Green compost is a synergistic combination of byproducts from marine life such as sustainably harvested Dungeness crab, and line-caught Albacore Tuna. This powerful and sustainable compost blend is the result of a long composting period during which the marine mix is augmented with aged humus and forest materials. An ample source of natural and organic nutrition, particularly nitrogen and calcium, Marine Green offers a powerful biology that includes the chitin consumers that decompose the crab shell component. This compost is great as an amendment or as top dress to support vigorous growth, bountiful harvests and strong, beneficial biology.
