T5 HO Fluorescent Bulb (MLT5-004)MaxLume T5 HO Fluorescent Bulbs

The MaxLume High Output (HO) T5 bulbs take into consideration the proper kelvin temperature when it comes to growing plants, NOT the human eye. Research has proven that the 5400k temperature improves vegetative growth than the standard 6500k lamps that you see in the market today. Our incomparable 2800k temperature are where the grower will see a noticeable difference in the bloom stage apart from the standard industry's T5's. Low case QTY's of 25 and unique packaging makes the MaxLume's T5's your #1 choice.
