Mykos Mycorrhizae Granular, 20lb

Model: hf-RT4403

Mykos Mycorrhizae Granular, 20lb

Manufacturer: Xtreme Gardening

Xtreme Gardening Mykos Mycorrhizae Granular, 20lb (RT4403) Mykos - Pure, Fresh & Alive: A beneficial organism, Mycorrhiza, plural Mycorrhizae, lives on the roots of plants and forms a symbiotic relationship. It then extends microscopic straw-like filaments called "hyphae" into the soil with which it extracts, transports, and dramatically increases a host plant's supply of nutrients and moisture. Pockets of nutrients and water in the soil which were once unreachable by standard root systems are now made accessible through the "super-mining" effects which mycorrhiza gifts to your plants.

Mycorrhiza also releases a glue-like substance into the soil (Glomalin) which improves water storage and capacity, leading to lower watering costs. Although ideal for use on all plants, mycorrhizae is especially beneficial toward: Tomatoes, Herbs (Thyme, Basil, Sage, ect), Pumpkins, Beans, Bulbs (all), Squash, Cantaloupe, Carrot, Celery, Corn, Cucumber, Garlic, Leek, Lettuce, Melon, Onion, Peas, Potato, Strawberry, and Grape Varietals.

Mycorrhizal fungi are ancient in origin and the benefits are boundless. Pound for pound mycorrhiza provides plants with the greatest possible benefit for the smallest amount of input. With a single inoculation, mycorrhiza is capable of transforming the ordinary garden into something Xtreme!

Manufacturer's Product Information

MSRP each \$199.95

UPC73621191955

Dimensions 2.5 x 8 x 2.5

Case Weight 41

Case Quantity 2

Price: \$117.90
