NfZyme 20 Liter

Model: NFNZ5G

NfZyme 20 Liter

Manufacturer: C.A.P. Custom Automated Products

Supplement (NFNZ5G) Nutrifield NfZyme NfZyme will unlock your plants potential by developing an improved fruit bearing structure. The unique formula will help control cell division and stimulate root growth. NfZyme aids in photosynthesis and food formation and has the ability to enhance all modes of growth or flowering. The reaction that will occur is dependant on the mode of root development, growth or flowering that the plant is experiencing. The key to this occurrence is the Cytokinin hormones within NfZyme; by making these hormones available at the correct stage, the plant will show an increase in yields. NfZyme also contains natural forms of Gibberellins, Auxins and Amino acids. These help with regulating growth, root formation and increase the plants metabolic rate.
