Manufacturer: Sunlight Supply

Odor-Sok

ODOR-SOK 6" X16" (16/CASE)

Extremely cost effective Lightweight, durable construction Easy to dispose - compresses to almost nothing Suitable up to 99% humidity Machine washable Odor-Sok Air Filters are constructed using bundles of microscopic activated carbon filaments and fibres. By controlling fibre width to 20 nm, the absorption rate of carbon cloth is similar to that of a single exposed carbon particle. Air flows evenly across the carbon and with accelerated absorption and increased surface area, Odor-Sok Air Filters retain all the properties of traditional canister filters. Faster absorption rates means smaller filter equipment and up to thirty times less carbon in use for the same result over a one-year period. That's how!

Manufacturer's Product Information

2007 MSRP Each \$79.95

Case Weight 22.58 LB

Case Dimensions 15. x 15.5 x 18.5 IN

Case Quantity 16

UPC 694320540100

Price: \$46.48
