oxyCLONE 20 Site Cloning System

Model: hf-OX20SYS

oxyCLONE 20 Site Cloning System

Manufacturer: -

oxyCLONE 20 is a simple, compact, recirculating cloning system. It works with a variety of cuttings, allowing you to have a perpetual garden year-round. Now powered by Active Aqua's premium, BPA-free water and air pumps! The submersible pump delivers constant turbulence to your reservoir while the attached Venturi valve naturally draws in air bubbles. For maximum aeration, the single-outlet Active Aqua air pump provides a constant flow of dissolved oxygen through a circular 4" air diffuser. No other cloner delivers dissolved oxygen like the oxyCLONE! For tips and FAQs, please visit www.oxyclone.com.

Features:

Won't leak or clog

Maximum oxygenation

Evaporative cooling means less retained heat

Powered with Active Aqua premium pumps

Price: \$43.55

Availability: This product will be in stock on Friday 29 September, 2017
