

pH Up Gallon Base

Model: eco-2825

pH Up Gallon Base

Manufacturer: General Hydroponics

pH Up Gallon Base (eco-2825)pH Up 1 gallon Base

pH Up: Base formulated using Potassium Hydroxide and Potassium Carbonate. Add a little at a time if your nutrient pH is too low in order to raise the pH to the proper level.

To maximize plant growth, the pH content of your nutrients should be slightly acidic. Experienced growers consider the ideal pH for most crops to fall between 5.5 and 6.5. Users of General Hydroponics nutrient products generally do not experience problems maintaining the proper pH range because our formulas are pH buffered. However, some important exceptions do exist. Acid content can reach unacceptable levels when nutrient solutions are mixed with poor quality water, or pH unstable media - such as rock wool and gravel products - are used, and when high plant growth rates destabilize the nutrient mix due to rapid nutrient absorption by the crop.

pH Up & pH Down

General Hydroponics pH adjusters pH Up base formulated using Potassium Hydroxide and Potassium Carbonate. pH Down acid formulated using food grade Phosphoric acid.

SKU: GH1523

Weight: 9.7 lbs.

Package Dimensions: 6.1L x 5.9W x 11.6H

Suggested Retail: \$107.60

Manufacturer's Product Information

MSRP \$26.9

Price: \$15.60
