

pHep

Model: hf-HI98107

pHep

Manufacturer: Hanna Instruments

Hanna Instruments pHep (HI98107)The pHep revolutionized the pH industry by providing non-technical personnel with a simple, inexpensive solution to accurate pH measurement.

This tool is used by millions of people around the world to monitor pH in laboratories and industrial applications as well as in agriculture, fish farming, food manufacturing and quality control, swimming pools, and the printing industry.

With a renewable cloth junction, the pHep has an extended life over typical pH testers. A normal junction clogs with use over time and a typical tester would normally have to be thrown away once the junction is too contaminated. Instead, the junction here is 2 cm long and when dirty, can be pulled out to expose a fresh section to effectively renew the pHep's life.

Calibration is performed manually at one or two points with a trimmer located on the side of the tester.

With a battery life of 700 hours of continuous use, the pHep will provide years of testing before the batteries need to be replaced.

Features

Renewable junction

Easy one or two points manual calibration

700 hour battery life

Simple to use

Economical

Includes protective cap, calibration screwdriver, batteries, and instructions

Manufacturer's Product Information

MSRP each \$66.95

Dimensions1.75 x 2.5 x 6.5

Case Quantity1
