Photosynthesis Plus 2.5 Gal

Manufacturer: MICROBE Life Hydroponics

Photosynthetic bacteria will promote photosynthesis in all plants, unlike endo and ecto fungi which only works on specific species. Enhances plant functions at the foliar level and the root zone in both soil and soilless substrates. Enhances photosynthesis and biological function by allowing plants to capture and utilize radiant energy more efficiently. Speeds uptake and distribution of essential macro- and micronutrients required for all plant metabolic functions and growth. Promotes plant vigor and reduces input costs while increasing yields.

Use in addition to ALL nutrient and fertilizer programs for maximum yields!
