PLANT SUCCESS GRANULAR 1LB MYCORRHIZAE (3-1-2) 12/case

Model: 720305

PLANT SUCCESS GRANULAR 1LB MYCORRHIZAE (3-1-2) 12/case

Manufacturer: Plant Revolution

PLANT SUCCESS GRANULAR 1LB MYCORRHIZAE (3-1-2)

Plant Success Granular - mycorrhizal granular inoculum consists of 10 carefully selected species of endomycorrhizae, ectomycorrhizae and trichoderma fungal species. A high quality biostimulant package containing kelp meal, humus, vitamins and amino acids is also added to improve mycorrhizal germination and effectiveness. Working together, beneficial mycorrhizal and trichoderma fungi expand into the surrounding soil and greatly increase the root's ability to absorb water, nutrients, improve yields and plant health.

Plant Success Soluble is a rich source of the beneficial fungi mycorrhizae. Ectomycorrhizae colonize the outside of the root while endomycorrhizae colonize the inside, facilitating root development and ensuring more efficient usage of water and nutrients. Over time, soil quality is improved as foliage, fruits, and vegetables grow bigger and bigger! Mix Plant Success Soluble with water and apply as a soil drench for best results; soluble formulation may also be used with large particle sprayers emitting 300 microns. Basic application rate for Plant Success Soluble is 6 ounces per 100 gallons of water. NEW (Price applies to EACH).
