PLANT SUCCESS SOLUBLE MYCORRHIZAE 4 OZ

Model: 720300

PLANT SUCCESS SOLUBLE MYCORRHIZAE 4 OZ

Manufacturer: Sun System / Sunlight Supply

PLANT SUCCESS SOLUBLE MYCORRHIZAE 4 OZ (24/CASE).

Plant Success Soluble is a soil drench for porous soil and contains 13 carefully selected mycorrhizal fungi, 2 trichoderma species and 17 bacterial species well-suited to a variety of soils, climates and plants. Plant Success Soluble contains mycorrhizal fungi that colonize plant roots and extend the root system into the surrounding soil greatly enhancing the absorptive surface area of root systems, forming an essential link between plant and soil, producing seedlings of the highest quality. Also included is specially formulated natural root biostimulant. The plant enjoys improved nutrient and water uptake, and superior field performance.

Plant Success Soluble is a rich source of the beneficial fungi mycorrhizae. Ectomycorrhizae colonize the outside of the root while endomycorrhizae colonize the inside, facilitating root development and ensuring more efficient usage of water and nutrients. Over time, soil quality is improved as foliage, fruits, and vegetables grow bigger and bigger! Mix Plant Success Soluble with water and apply as a soil drench for best results; soluble formulation may also be used with large particle sprayers emitting 300 microns.

Basic application rate for Plant Success Soluble is 6 ounces per 100 gallons of water. NEW (Price applies to EACH).
