Power Cloner 180 White w/Dome

Model: eco-4702

Power Cloner 180 White w/Dome

Manufacturer: -

Power Cloner™

Power Cloner™ - The Power Cloner's high output pump and microjet sprayers deliver a highly oxygenated spray of water and rooting hormones to the stem of the cutting. The cuttings are mechanically supported by a flexible neoprene collar which holds the plant cutting in the Power Cloner while suspending the cutting stem in the nutrient reservoir. By eliminating the growing media and suspending the bare cutting, there is more surface area available for root initiation and growth. In addition, this increases the surface area in the root zone available for the absorption of atmospheric oxygen, dissolved oxygen and rooting hormones.

45, 77, 180 plant sites

10, 20, 40 gallon reservoir

Humidome™ options*

Recessed cord guide

High pressure sprayers

Ceramic air stones

Power Clone™ Solution

AquaShield®

Zho™

High-pressure submersible pump with 2 year manufacturer's warranty
