

Primo TDS Tester

Model: hf-HIPRIMO

Primo TDS Tester

Manufacturer: Hanna Instruments

Hanna Instruments Primo TDS Tester (HIPRIMO) Primo testers provide a fast and dependable way to measure the total dissolved solids or conductivity in your water samples. Each tester is ideally suited for the rigorous demands of water quality professionals. Many professionals use the cabled version of the Primo when demonstrating the before and after results of conditioning and filtration systems.

Temperature is compensated automatically to ensure readings are consistent to the standard or reference temperature.

Operating and routine maintenance has never been easier. Primo TDS uses a single button at the top of the meter. Press it once and the meter is powered and ready for use. Press and hold the button for a few seconds and Primo automatically enters calibration mode. Simply open a sachet of calibration solution, dip the probe in, and within seconds the meter recognizes the calibration solution and calibrates itself!

Features

Direct probe connection

Automatic calibration

Automatic temperature compensation

Includes batteries and instructions
