Model: HLMGPCF

Pro Carbon Filter/Drinking Water

Manufacturer: C.A.P. Custom Automated Products

MERLIN GARDEN PRO RO SYSTEM (HLMGPCF)MERLIN GP

The Merlin Garden Pro will produce 30 gallons of water per hour - 750 gallons per day. It will remove 95% of chlorine, calcium, excessive minerals and other contaminants. This will help prevent nutrient lockup by allowing you to know exactly what your plants are getting. It measures 10" x 18" x 20". Comes with 2 reverse osmosis membranes, carbon pre-filter, and inlet pressure gauge. It will hook up to a standard garden hose fitting ($\frac{3}{4}$ "). The Eco Green Drain Elbow replaces the existing black drain elbow and saves 25% of the drain water. By forcing more untreated water through the RO membranes, less water goes to waste out the drain line. It comes with a 3 year warranty (1 year if used commercially).
