

Probe Care Kit-pH

Model: hf-BLU7003

Probe Care Kit-pH

Manufacturer: Bluelab

The instrument is only as accurate as the probe is clean.

Probe cleaning is one of the most important parts of owning or operating any Bluelab meter, monitor or controller. The probe surface is where the instrument takes the reading of the solution or soil/media. If the probe face is dirty or contaminated, then the reading will be inaccurate.

Accurate readings simplify crop management and provide improved growth.

Kit Contents: • Probe care instructions • 20ml single-use Bluelab Solution Sachets, 2 each of: pH 7.0 & pH 4.0 and KCl. • 3x plastic cups • Bluelab pH Probe Cleaner • Bluelab Toothbrush (pH probe cleaning instrument)

Price: \$10.88
