Quantum 1000W Digital Ballast, 120/240V Dimmable

Model: hf-QT1000

Quantum 1000W Digital Ballast, 120/240V Dimmable

Manufacturer: HydroFarm

Quantum 1000W Dimmable Ballast

The Quantum Dimmable Ballast brings quality, efficiency, and high intensity illumination to your garden. With a Power Factor of 99.9%—a highly stable output frequency—the Quantum Dimmable ballast lets you run your lamps at the strength you need allowing you to control your light spread. Rigorously engineered, it features a resin cased circuit board with a sealed bearing fan so it will run cooler than any other ballast and it's been tested to withstand the extreme atmospheric conditions of virtually any growing environment. The Quantum Dimmable Ballast is silent, generator-ready, efficient, and cool-running—this is one cool ballast.

Run at 100%, 75% or 50% power (400W runs at 100% and 75%)

Strikes both metal halide and high pressure sodium bulbs

Accepts 120V/240V with no wiring needed (both cords included); 208V-configurable with electrician assistance

Accepts 50 Hz to 60 Hz with no extra wiring needed

Runs 15% cooler than other digital ballasts on the market

Has a continuous power factor of 99%

The most stable output frequency of any ballast

Higher lumen output than magnetic ballasts

Can run efficiently on generators without flickering

Resin sealed circuit board for high humidity installations

Can easily be used in conjunction with lighting controllers and flip boxes

Price: \$131.98
