Thermostats

Rapid Rooter Mat

Model: eco-2301

Rapid Rooter Mat

Manufacturer: General Hydroponics

Rapid Rooter Mat (eco-2301)Rapid Rooter Mat

Derived from naturally composted tree bark, created through a process which produces large populations of beneficial microbes which colonize roots to help plants maximize nutrient uptake. Optimal air-to-water ratio.

98 natural plant starters for propagating cuttings and germinating seeds

New! cross cut for better contact around the stem

Rapid Rooter

Rapid Rooter's technology produces a unique matrix of composted organic material bound together by plant-derived polymers. Rapid Rooter is created through a scientifically controlled process that produces large populations of beneficial microbes in the plug media. These naturally occurring beneficial microbes colonized young roots and help young plants to resist disease while maximizing nutrient uptake. Rapid Rooter plugs are fortified with General Hydroponic micronutrients for abundant root growth. The optimal air-to-water ratio within the plug matrix causes explosive early root growth. Use Rapid Rooters for robust early rooting that promotes explosive plant growth.

SKU: GH3257

Weight: 3.3 lbs.

Package Dimensions: 20.5L x 16.7W x 10.3H

Suggested Retail: \$19.80

Manufacturer's Product Information

MSRP \$19.8
