Rhizo Gel, 100 ml

Model: hf-BCNSRZG100

Rhizo Gel, 100 ml

Manufacturer: Botanicare

Rhizo Gel, Botanicare's newest clone gel is a viscous agent designed to cling to cuttings and promote root growth on herbaceous and woody cuttings. Its unique formula allows for easy absorption of the rooting hormone Indole-3-Butyric Acid and spurs new root growth. Vitamin B1 as well as a light nutrient charge in Rhizo Gel also strengthens delicate cuttings while antiseptic components ensure a sterile and clean wound for quick healing and prolonged protection.
