## RootBuilder II High Five, 5-7 Gallon (25 per case)

Model: hf-WG6550

RootBuilder II High Five, 5-7 Gallon (25 per case)

Manufacturer: RootMaker

The RootBuilder™ II container system has many holes with downward facing protrusions all around the container.

This design allows roots reaching towards the container wall to locate the air holes immediately.

The downward protrusions will make the directed root virtually impossible to escape root tip pruning. Another feature of the angled protrusions on the containers is that they not only force roots downward to the air hole for proper air pruning, they also create shade, keeping your entire plant's root system much cooler.
