ROOTECH CLONING 8 OZ. (BCRT8)ROOTECH CLONING GEL

Rootech Cloning Gel is a premium formulation of hormones, vitamins and nutrients, ideal for promoting rapid, healthy root development for clones. A thick gel, Rootech adheres to the plant cutting throughout the rooting phase, sealing cut tissue immediately and reducing the risk of infection. Rootech comes in a ready-to-use, wide-lid container, into which several cuttings can be dipped at the same time, without fear of tipping. Contains .55% Indole 3 Butyric Acid. Available in four sizes.
