Rootech Cloning Gel™

ROOTECH GEL 4 OZ. (12/CASE)

Rootech Cloning Gel is an exceptional recipe containing a powerful hormone especially formulated to promote rapid, healthy root development during vegetative propagation. At application, Rootechs unique formulation surrounds the stem so it can be used immediately. Technafloras original formulation is among the strongest cloning gels on the market, with a concentration of 0.55% (5.5 g/L) IBA
