Manufacturer: Aurora Innovations

Roots Organics Growing Media

ROOTS SOIL 1.5 CU FT

ROOTS ORGANICS NATURAL & ORGANIC POTTING SOIL A truly exceptional ready-to-use coco fiber-based potting soil. We begin with a base of the highest quality coco fiber/Coir on the plant which is repeatedly washed for an incredibly low EC, and composted for over twenty-four months, and is specially blended with extra long fibers. This soil is amended with only the highest quality organic ingredients including bat guano, premium earth worm castings, fish bone meal, feather meal, green sand, mycorrhizae, glacial rock dust, soybean meal, humic acid, and many more. Already blended with correct proportions of perlite and pumice for excellent drainage and a vigorous root system, Roots Organics potting soil encourages healthier plants and better yields. Comes in a heavy-duty, ready-to-grow, 1.5 cu ft/10 gal, camouflage print bag; simply poke holes in the bottom, cut off the top, and plant. ROOTS ORGANICS COCOFIBER HYDROPONIC SOILLESS MEDIA A unique formulation of the highest quality coco fiber/Coir on the planet which is repeatedly washed for an incredibly low EC, composted for over twenty-four months, and specially blended with extra long fibers, perlite, and pumice. Lightly amended with a starter charge of organic fertilizers like bat guano, worm castings and kelp, this mix is designed for heavy feeding and high performance in container or hydroponic applications. Coco fiber is a great medium and an excellent replacement for peat moss; it is an environmentally friendly byproduct, pH stable within the ideal range for nutrient uptake, and because of the Lignin content is slow to decompose. Roots Organics Coco soilless mix was created for the gardener who demands higher performance from their plants.

NOTE: Sold individually. Pallet quantity is listed for your reference in case you wish to order palletized.
