Royal Gold Tupur

Manufacturer: HydroFarm

Royal Gold Royal Gold Tupur (RG14502) Royal Gold Tupur was developed with one idea in mind-feeding the plant as much and as often as possible!

This high porosity mix allows the gardener to feed often, supplying all major NPK with any nutrient system.

Although it was created for "slow drip" drain to waste systems, gardeners have enjoyed success in conventional and hydroponic style gardens and in containers of all sizes.

Feed 1 to 6 times a day depending on the size of your container. To decrease the feeding schedule, use a drain dish to catch run off. Decrease the fertilizer rate by 1/3 to 1/2 if there is no run off.

It is also recommended that you water (pH Balanced) every third feeding. Be sure to supplement Calcium and Magnesium as coco soils use this at a higher rate.

Also, adding bloom enhancers greatly increase your yield. Get Tupur!!
