

SNS 203 Pesticide Concentrate 1 Gallon

Model: dl-SNS203-1GAL

SNS 203 Pesticide Concentrate 1 Gallon

Manufacturer: -

SNS 203 Pesticide Concentrate 1 Gallon (SNS203-1GAL) SNS-203 Concentrated Natural Pesticide Soil Drench and Foliage Spray is made up of pure Rosemary and Clove botanical extracts. The botanicals are all food grade GRAS (generally recognized as safe) materials.

SNS-203 Kills and Repels Fungus Gnats, Root Aphids, Thrips, Shore Flies and White Flies.

How It Works

High moisture levels in soils and around pots encourage the development of fungus gnats, shore flies and other pests. Fungus gnats will feed on fungi and decaying organic material in the soil. If a fungal food source is not readily available, fungus gnats may feed directly on plants. During the propagation of cuttings, fungus gnats may feed upon the callus. This may slow down or completely inhibit rooting. They can also damage the roots as they feed upon seedlings and potted plants. On many thick and succulent stemmed plants, larvae may tunnel into stems and cause plants to wilt and die. Larval feeding upon young roots encourages the development of root and stem rots such as Pythium. When this occurs, plants will be stunted with reduced growth and leaf drop.

Directions for use

Test drench or spray for Phytotoxicity on a small area of the soil or plant before use. Do not apply in direct sunlight or under grow lamps, let plants cool off before applying SNS-203.

Soil Drench: Shake well before mixing. Mix 2-4oz of SNS-203 per one (1) gallon of water to make ready-to-use (RTU) drench solution. Thoroughly drench affected and surrounding area with RTU. Reapply drench if necessary.

Foliage Spray: Shake well before mixing. Mix 2-6oz of SNS-203 per one (1) gallon of water to make ready-to-use (RTU) spray solution. Spray foliage to point of runoff.

Repeat application 5 to 7 day intervals or as needed. Thorough uniform coverage of plant soil or plant surface i.e. essential for good pest control. Thoroughly wash all food areas and food materials contacted with soap and water. As with any natural oil based product Do Not Spray directly under Sunlight or Grow lights this could damage to the plant.

Active Ingredients

Clove Oil 1.5%

Rosemary Oil 0.53%

Other Ingredients 97.97%

Water

Polyglyceryl Oleate

Lauric Acid
