Superroots Air-Pot #Prop (0.3 gal - 1L), case of 25

Model: hf-THAPPROP

Superroots Air-Pot #Prop (0.3 gal - 1L), case of 25

Manufacturer: HydroFarm

SEED GERMINATION, SEEDLINGS, CUTTINGS A good start is critical in growing a healthy plant. The 1L (.3 gallon) Air-Pot is the perfect way to germinate seedlings or for potting cuttings. Cuttings are ready to transplant within 2 to 3 weeks. Plant directly in the garden or any size Air-Pot up to the #15, depending on the size of plant and grow cycle you desire. Plants will not suffer transplanting shock.

Actual size: 0.3 gallons or 1 liter

Dimensions: 6"H x 4.75" Outside Diameter (4" base)

The Superroots Air Pot is a recyclable, reusable plastic container that actively enhances the quality of the root systems of plants. This revolutionary approach to containerizing plants and trees produces fabulous, non-spiraling root systems that are impossible to develop in any other available container.

Made of recycled HDPE in the UK, the Superroots Air-Pot is circular in shape with a perforated sidewall. There are no flat surfaces due to the inward and outward pointed cones, which eliminates any chance of starting the spiraling process as well as dramatically increases growth rates.

Air-Pot benefits:

Eliminates root circling

Reduces growing time in the garden

Increases yields

Simplifies production

Minimizes the need to transplant

Ensures Superior Performance in Extremes of Weather

The Air-Pot is made of recycled HDPE plastic

Reduces the chance for overwatering

Price: \$41.08
