TITAN CO2 INLINE HEATER 120V

Model: 702715

TITAN CO2 INLINE HEATER 120V

Manufacturer: Titan Controls

Titan Controls® CO2 Inline Heater

The Titan Controls® CO2 heater was designed to prevent CO2 regulator freeze-up and avoid cracking the internal diaphragm of the regulator due to high flow conditions. The CO2 Heater is installed between the CO2 cylinder valve and the regulator, and warms the gas stream allowing for increased flow rates without regulator freeze-up. Plastic washers are included with the CO2 Heater to provide a secure connection that prevents tank leakage. The CO2 Heater may be used in conjunction with a Titan Controls CO2 Greenhouse Regulator or any other CO2 regulator system currently available in the marketplace.

Key facts about the CO2 Heater:

Aluminum case and solid brass expansion chamber.

Completely enclosed heating element.

Solid brass fittings for CO2 cylinders, CGA 320.

Power consumption = 100 watts.

Electrical = 115 Volts, 50/60 hertz, single phase.

Capacity = 90 scfh maximum.

NEMA 5-15 grounded power cord.

Manufactured in USA.

MSRP: \$169.95

Price: \$133.62
