Vegetable & Fruit 16 oz Yield Enhancer-C CA ONLY

Model: hf-ML21632

Vegetable & Fruit 16 oz Yield Enhancer-C CA ONLY

Manufacturer: MICROBE Life Hydroponics

Vegetable & Fruit Yield Enhancer-C is a unique conditioner that is derived from extremely rare and highly decomposed organic matter - made up of marine organic matter and vegetative organic matter. Vegetable & Fruit Yield Enhancer-C also contains bacillus and other live microbes. The result is a better media structure that may aid in the ability of vegetables and fruits to absorb nutrients. Vegetable & Fruit Yield Enhancer-C is formulated with reverse osmosis and UV sterilized water.

Application Uses Vegetable & Fruit Yield Enhancer-C may be used indoors/outdoors, added to solutions for all hydroponic, NFT, drip, aeroponic, irrigation, and continuous liquid feeding systems. Vegetable & Fruit Yield Enhancer-C may be used with all soil and soilless media, including Coco Coir and is compatible with all nutrient programs.

Always check for pH and CF levels.
