Vermi T 5/10 Extractor 26" x 18" x 13"

Model: 720720

Vermi T 5/10 Extractor 26" x 18" x 13"

Manufacturer: Vermicorp Organics

VERMI T 5/10 EXTRACTOR

This new light weight, easy to clean Bio Extractor is designed to produce a fresh microbial rich extract in 24 hours. This new revolutionary process is used to multiply beneficial micro organisms through the recirculation and injection of highly aerated water into a Vermi T Bio-cartridge. Typically compost tea must be used immediately after brewing. Unlike compost tea our research and development team has found by culturing a consistent, correct balance extracted from a Vermi T Bio-cartridge and the immediate refrigeration of the fresh extracted solution, Vermi T will maintain 100% viability for 7 to 10 days.

MSRP: \$449.99

VERMI T BIO-CARTRIDGES 720725 & 720740

This Cartridge is the key to the multiplication of a diverse microbial rich solution from your Vermi T 5/10 Extractor. This configuration is sold off the shelf without bottles for customers that own their own Vermi T 5/10 Extractor. When purchased in case quantity it comes in a full color display case that easily fits on a counter or shelf. Cartridge has a 2 year shelf life. Sold in case quantity only.

Optional VERMILOGIC® WATER PURIFICATION SYSTEM 720722

The VermiLogic Water Purification system was specifically designed by HydroLogic for the Vermicorp Organics 5/10 extractor. This unit instantly reduces Chlorine/Chloramine and Sediment making tap water ideal for the extraction process. This unit is also ideal for filling up reservoirs or making city water taste great! This filter lasts for up to 1000 gallons before it has to be replaced. There's no waste water just hook it up to your standard household faucet and you're good to go!

Price: \$357.50
