

Soil & Hydroponics Grow Media

- Hydroton / HigoMite,

Rockwool / Stonewool, Coconut Coir

(Coco), Potting Soil, Worm Castings

VermiPro Soilless Medium, 3.8 cu ft Bale

Model: hf-VC995708

VermiPro Soilless Medium, 3.8 cu ft Bale

Manufacturer: Vermicorp Organics

VermiPro™ is a soilless growing medium equipped with extremely high porosity which allows for aggressive feedings. Highly experienced gardeners designed the ultimate ratios of triple washed coco coir, the highest grade peat moss, aged softwood bark, perlite, and mycorrhizal fungi. Professional growers use VermiPro™ as a standalone hydroponic/soilless medium, or combine their own nutrients and organic matter into VermiPro™ to create a custom soil blend. As a standalone medium, it is recommended for indoor or greenhouse use only. When mixed with water retaining organic matter (such as VermiBlend), it creates an excellent outdoor medium. This medium was designed to give the grower all the tools necessary to perform like a PRO!

Analysis

• 0.03-0.03-0.03 • Total Nitrogen (N) 0.03% • 0.01% Ammoniacal Nitrogen • 0.01% Nitrate Nitrogen • 0.01% Water Insoluble Nitrogen • Available Phosphate (P2O2) 0.03% • Soluble Potash (K2O) 0.03%

Derived from: Bat Guano

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

• Glomus Intraradices 0.5 prop/cc

Soil Amending Ingredients: Peat Moss, Coco Coir, Softwood Bark, Perlite and Dolomite Limestone (pH adjuster)

Price: \$40.21
