## WOODS ROOTING COMPOUND GAL (Case of 2) Special Order

Model: 726570

WOODS ROOTING COMPOUND GAL (Case of 2) Special Order

Manufacturer: Earth Science Products Corp

Wood's Rooting Compound Special Order

Wood's Rooting Compound provides a safe, effective and inexpensive way for the professional and home grower to take advantage of rooting stimulants for plant propagation. This formula consists of approximately 10,000 parts per million of indole -3butyric acid, (IBA) and 5,000 parts per million of Napthalene acetic acid (NAA). Wood's utilizes a special ion-exchange formula that makes absorbtion into tissue instantaneous. Works on softwood, medium hardwood and hardwood cuttings. This compound is a soluble concentrate. EPA registration No. 43905-1.
