Model: hf-RT8106

Xtreme Tea Brews 14ct, 500g 2.5 Gal

Manufacturer: Xtreme Gardening

Xtreme Gardening Xtreme Tea Brews 14ct, 500g 2.5 Gal (RT8106) XTREME TEA BREWS are an easy to use, easy to brew blend of organic matter that is packed full of healthy soil microbes.

With the beneficial microorganisms present in Xtreme Tea Brews, organic fertilizers can be fully-harnessed and delivered to plants with unparalleled "natural-efficiency". The beneficial microbes work in symbiosis with plants, to break-down carbon-dense compounds, release nutrients in plant available forms, and help shield plant roots from pathogens and disease.

When these beneficial organisms are returned to the soil, the entire microbial matrix begins to work in concert to optimize plant growth. The success of crop development also benefits all the beneficial microbes that are involved in the process. It's a "Win-Win" relationship. Mother Nature has been evolving and perfecting her growing methods for over 450 million years. Xtreme Tea Brews work with Nature, instead of against her, to deliver the Xtreme Results you've been looking for.
