## Zenport ZJ124 Large Wire agri-lock (10 - 14 gauge Gripple)

Model: ZJ124

Zenport ZJ124 Large Wire agri-lock (10 - 14 gauge Gripple)

Manufacturer: Zenport

Zenport ZJ124 Large Wire agri-lock (10 - 14 gauge Gripple) (ZJ124) Zenport ZJ124 Large Agri-Lock Trellis Wire Fastener

ALL NEW! Zenport "Easy Release" ZJ121 Medium and ZJ124 Large Agri-Lock Wire Lock Trellis Fasteners. The New Zenport Agri-Lock Wire-Lock fastener is the new way to hold high-tensile wire together.

This unique wire joiner works anywhere you need to join wire quickly, its excellent performance on tensile strength = 650 kg (or 1,430 lbs) is close to the full strength of high-tensile wire itself. It is installed in the same manner as the Gripple.

Up to six times faster than traditional methods of joining smooth wire and fencing. Inside the Zenport Wire Lock Fastener, each wire moves in one direction only, passing over high precision gear-tooth rollers. The moment any load is applied in the opposite direction, the rollers bite, locking the wire.

The Zenport Agri-Lock also features an easy to use release mechanism so that you can use the same Agri-Lock wire fastener, season after season! Great quality to last! Better performance!

Use for in-line splices, loop anchoring and repairs in vineyards, orchards and farms. Recommended for trellis lines up to 750 feet. The Zenport Agri-Lock Wire Fastener has one wire path and is used to secure wire at the end post (drill a hole through your metal or wood posts).

Medium Zenport Agri-Lock Wire Fasteners are suitable for use with:

Next Generation Design: Easy Release Lock!

2.00 to 3.25mm mild steel plain wire.

2.00 to 2.85mm hi-tensile steel plain wire.

2 x 1.60mm mild steel barbed wire.

Working Load: 400kg (1180 lb) plain and barbed wire .

Large Zenport Agri-Lock Wire Fasteners are suitable for use with:

Next Generation Design: Easy Release Lock!

4.00mm mild steel plain wire.

2 x 1.60mm mild steel barbed wire.

Working Load: 600Kg (1320 lb) plain wire, 150kg (330 lb) barbed wire.
