COCOTEK® ORGANIC GROWING MEDIUM

4' x 4' x 1" Thick

CocoTek® Grow mats are made from a strong weave containing 100% organic coconut fiber and natural rubber. Roots

will thrive in this natural media. These mats can be easily cut to fit any size application. They are designed to lay underneath baskets, slabs and cubes. Roots will grow under mats where moisture remains in a hydroponic tray between flood cycles protecting them from drying out.

The coco bricks are ideal for indoor or outdoor gardening. CocoTek® is pH balanced, and contains the lowest known sodium content for coir fiber. It increases water holding capacity and nutrient retention, expanding to 5 times its condensed brick size (1 brick expands to 3-1/2 gallons). CocoTek® can be mixed with any other growing media (Perlite, Grow Rocks, soil, etc.) to make the desired final mixture. The mixed brick has larger particulates than the standard coconut brick. The mixed brick contains coconut chips, fiber & fine coir to increase the structure of the media.

These unique mineral deposits offer a broad range of trace elements that support microbial activity which enhances root growth, plant vigor and crop yield.

Higromite™ provides several advantages over expanded clay pebbles, coco, and rock wool. It's high in silica, pH neutral, and has the best moisture retention & release on the market today. Completely reusable, the varied shapes of the rocks promote porosity, allowing more oxygen to reach the roots.
