Fusion Grow Base Nutrient 20L

Model: hf-GGFGN20L

Fusion Grow Base Nutrient 20L

Manufacturer: HydroFarm

Rock Nutrients Fusion Grow Base Nutrient 20L (GGFGN20L) Rock Fusion Grow and Rock Fusion Bloom are here to astonish you. This single part nutrient is stronger than most 2 part nutrients and 3 times stronger than any clear single part nutrient on the market today. Other single part nutrients are clear with no fallout but in order for this to happen it has to be made a lot weaker so that the elements don't react, therefore the results aren't as beneficial.

Fusion is suitable for all growing systems and has been made with the highest quality components, we have not compromised at all on this nutrient. It is a high performance plant food with long shelf life elements that won't drop out.

These products are highly concentrated therefore will save you money, making your dollar go further without compromising the results as less is needed for each cycle. Only 2 - 4mls per litre of working solution compared to 10ml with other nutrients. Always check the EC levels and flush when required.

• Best single part nutrient on the market • Suitable for all grow systems and media • No more mixing 2 or 3 nutrients • Stronger and high quality components • Long shelf life elements
