## Grow Flow 7-Gal Controller & Bucket Kit

Model: eco-4775

Grow Flow 7-Gal Controller & Bucket Kit

Manufacturer: HydroFarm

Grow Flow 7-Gal Controller & Bucket Kit

Active Aqua's Grow Flow is the most efficient ebb & flow system on the market. The fill and drain cycles are maintained by the controller unit and set with the built-in timer. This system can be set up in many different sizes and shapes to fit your exact growing needs.

Grow Flow is the only unit on the market with fail-safe overflow protection. If the float valve stops operating, the emergency shut-off valve will automatically power down the system, preventing any spillage or damage to your growing area. At the same time, the LED indicator light will light up on the control panel. Since your pumps are only pumping a short time each day, the system is extremely reliable and efficient.

The main controller bucket has adjustable fill height and an emergency shut-off valve. Grow Flow controller units and buckets are also available separately.

Features

Connect 6 to 48 growing modules to a single system

Adjustable float ladder

LED emergency indicator light

Concave center drain buckets are engineered to fully drain, no more stagnant water in the root zone

Individual inner buckets allow you to easily move plants

UL-listed water pumps operate on standard 120-volt

System Includes:

7 gallon controller module

55 gallon distribution reservoir

Two 250 GPH high-flow pumps

12 bucket modules

All of the fittings & tubing to install the system

3 year warranty
